

DigiPrime® 050

USAGE DigiPrime® 050 imparts a print-receptive surface to film and metalized film substrates to improve the transfer and adhesion of HP Indigo Electroinks. It is used in the in-line priming unit available on the Indigo 20000 Digital Press. This product is suitable for food contact. Clean up must be accomplished with soft water while the applicator roll is still damp. In case the primer dries, residue may be cleaned by scrubbing with soap and water. For hard residues, a mix of caustic solution might be used.
